

Follow Up / Clarification of Records Request for Flock / ALPR Camera System6 messages

[REDACTED]
To: Joshua Ward <Joshua.Ward@cityofls.net>

Mon, Aug 10, 2026 at 10:26 AM

Good morning Mr. Ward,

Thank you for the response.

I would like some clarification regarding the statement that the Lee's Summit Police Department has "no responsive records" to my request.

If the City and/or Police Department are using Flock Safety cameras or other ALPR/video surveillance equipment within Lee's Summit, there should presumably be records identifying how that equipment was acquired, funded, installed, maintained, or authorized.

Please consider this email a new request under the Missouri Sunshine Law for records concerning Flock Safety, ALPR cameras, Falcon cameras, Condor cameras, and related equipment used by or on behalf of the City of Lee's Summit and/or Lee's Summit Police Department.

Specifically, I am requesting records sufficient to identify:

Who owns the cameras and associated equipment currently being used by the City or Police Department.

Who purchased or paid for the equipment, including whether funding came from the City, Police Department, grants, another governmental agency, a private organization, or another source.

The total cost of the system, including equipment, installation, subscriptions, licensing, maintenance, cellular/data service, and any recurring costs.

Who installed the cameras, including the contractor, vendor, City department, utility, or other organization responsible for installation.

All contracts, purchase orders, invoices, quotes, bids, agreements, subscription agreements, and statements of work concerning Flock Safety or other ALPR systems.

Any grants or outside funding used to purchase, install, operate, or maintain these systems.

The number and models of cameras currently deployed, including Falcon, Condor, Condor PTZ, or any other Flock equipment or ALPR related systems.

Records identifying the general locations of City-owned or City-operated cameras, including installation records, site lists, maps, work orders, or similar documents.

Any agreements allowing Lee's Summit Police Department to access cameras or ALPR data owned by another governmental agency or private entity.

Records identifying the City's Flock Safety account administrator and the City department responsible for administering the system.

Policies, procedures, retention schedules, training materials, or directives governing access to and use of Flock/ALPR data.

Records showing which outside agencies or organizations are authorized to access or receive Lee's Summit Flock/ALPR data.

If the Police Department does not possess these records, please identify which City department, governmental entity, or other organization maintains them so that I can direct my request to the appropriate records custodian.

If the cameras are not owned by the City of Lee's Summit, I am specifically requesting records sufficient to identify who does own them and under what agreement Lee's Summit Police Department is permitted to access or use the cameras or their data.

If any portion of this request is denied or withheld, please identify the specific legal authority supporting the denial or redaction.

Electronic copies are preferred.

Thank you,

Trace Kitzmann

Documents Requested:

(Provide as much detail as possible to assure the documents you are requesting can be located.)

Dear Records Custodian,

Pursuant to the Missouri Sunshine Law, Chapter 610 of the Missouri Revised Statutes, I am requesting access to and copies of all public records maintained by the City of Lee's Summit relating to Flock Safety cameras and any Flock Safety system records associated with my vehicle.

Please provide all responsive records, including but not limited to:

All photographs, images, video, or other visual recordings captured by Flock cameras depicting my vehicle.

All license-plate-reader records associated with my vehicle.

All vehicle detections, timestamps, locations, camera identifiers, and associated metadata.

All records identifying the date, time, and location of each detection of my vehicle.

All alerts, notifications, hot-list matches, or other automated records associated with my vehicle.

All records of searches, queries, lookups, or other database activity involving my vehicle or its license plate.

Records identifying any City of Lee's Summit employee, law-enforcement officer, agency, or other authorized user who accessed, searched, viewed, downloaded, shared, or otherwise interacted with records concerning my vehicle, to the extent such records are public.

Any audit logs or access logs associated with searches or access to records concerning my vehicle.

Any records reflecting the sharing, disclosure, export, download, or transmission of images or other information concerning my vehicle to another agency or entity, to the extent such records are public.

This request includes records maintained directly by the City of Lee's Summit as well as records maintained on the City's behalf by Flock Safety or through a Flock Safety platform, to the extent those records are considered public records under Missouri law.

For purposes of identifying the responsive records, my vehicle is:

Vehicle: [REDACTED]

License Plate: [REDACTED]

State: Missouri

I am requesting records for the entire period for which responsive records concerning this vehicle are maintained and available, rather than a limited date range.

Please provide the records electronically whenever possible. If any portion of the requested records is exempt from disclosure, please identify the specific statutory exemption supporting the withholding or redaction and release all reasonably segregable portions of the records.

If fulfilling this request would result in fees, please provide an estimate before incurring charges. If the City believes clarification or narrowing of this request is necessary, please contact me before processing the request.

Thank you for your assistance. I look forward to receiving the responsive records within the time required by Missouri law.

Sincerely,

Trace Kitzmann, A Pissed off Taxpayer.

To: [REDACTED]

Good morning,

When I informed you we had no responsive records to your request, that meant we had no records that matched any of the types of records you had sought in your original request, such as "All license-plate-reader records associated with my vehicle" and "All records of searches, queries, lookups, or other database activity involving my vehicle or its license plate".

We are actively working to fulfill your new request that we received yesterday, 08-10-2026. Records shall be extensively reviewed to protect closed or confidential information under Missouri Law. §610.021, RSMo. At this time, the Records Unit is working on a significant number of Sunshine Law Requests and as a result, we will need additional time to provide you with an estimated cost and number of responsive records. Due

to the extensive process of search, review and obtainment of records, we estimate that your request will be fulfilled within 25 business days.

Before providing responsive records, the Records Unit must:

1. Process and review the Sunshine Law request;
2. Notify relevant staff members of the request to obtain potentially responsive records that are not immediately accessible to the staff reviewers(s), if applicable.
3. Staff reviewer will then review the records to determine if they are responsive to the request;
4. Staff reviewer converts all responsive records in an accessible and useable format; and
5. Compile or print the responsive documents.

Please note that the above process is dependent upon the availability of other Lee's Summit Police Department staff members to locate records, the volume of the request, other active Records Unit Sunshine Law Requests, and the on-going work of staff reviewers.

610.026, RSMo allows for collection of fees, including search, research, and staff time for retrieving, identifying, providing the requested records. Please note, that an invoice or other request will be sent to you for any charges incurred in the fulfillment of your request prior to release of responsive records. The schedule of fees can be located at <https://cityofls.net/finance-budget-taxes/schedule-of-fees>.

Please let me know if you have any questions.

Professionally,

Joshua Ward #0604

Good morning,

I appreciate the response again, and look forward to a VERY TRANSPARENT REPORT. However, this is where, as a taxpayer, I become increasingly frustrated with the answers I am receiving.

I want to make sure I understand the City's position correctly. I am being told that, over the past 30 days, despite there being more than 50 active cameras, there are no photographs, plate reads, detections, associated records, or other captured data involving my vehicle?

I know for a fact that my vehicle has traveled through areas covered by these cameras during that timeframe. I have also had officers sitting nearby and observing me while I was parked directly in front of them. Given those circumstances, I find it extremely difficult to believe that there is absolutely no record associated with my license plate.

If the issue is not that the records never existed, but rather that they have already been deleted, automatically purged, are subject to a retention period, are maintained by Flock Safety or another third party, or are otherwise inaccessible through the search that was performed, then I would like that stated clearly.

Please clarify the following

Whether my plate was actually searched or scanned within the Flock/ALPR system.

What the City's current retention period is for Flock/ALPR photographs, plate reads, metadata, and related records.

Whether records responsive to my request may have existed but were deleted or automatically purged before the request was processed.

Whether any responsive records are maintained by Flock Safety or another third party rather than directly by the City.

Whether officers or other authorized users can access historical detections that the City's records custodian cannot.

If the City maintains that no responsive records exist, please confirm whether that means no records were ever generated or simply that no responsive records currently remain in the City's possession.

At this point, I am not asking for another generalized statement that no records were located. I am asking for an explanation of how that determination was made.

If more than 50 cameras are actively collecting vehicle information throughout the city, taxpayers deserve a clear understanding of what is being collected, how long it is retained, who has access to it, and why records involving a vehicle known to have traveled through monitored areas apparently cannot be produced.

I would appreciate a specific response addressing these questions.

Thank you,
Trace Kitzmann

Mr. Kitzmann,

The Records Unit only provides records and general answers in response to the availability of records. However, I am going to forward the questions in your emails to the Public Information Unit (PIU) to see if they are able to assist you.

The estimated timeline for providing the requested records from the emails below is still 25 business days. I will forward the questions today to the PIU and follow up with them when I return to the office next Wednesday, 08-19-2026.

Some questions may be answered by visiting our LSPD Transparency Hub located here:

<https://cityofls.net/police-department/public-information/transparency-hub>

Mr. Ward,

Thank you for the response.

I understand that production of records may exceed three business days for reasonable cause. However, pursuant to § 610.023.3, RSMo, when access is not granted immediately, the custodian is required to provide a detailed explanation of the cause for further delay, along with the place and earliest time and date the records will be available.

Your response provides an estimated timeline of 25 business days, but I do not see a detailed explanation for the delay or an earliest specific date and time the records will be available.

Please provide that information pursuant to § 610.023.3.

I also want to clarify that my Sunshine request is for existing records. To the extent my previous correspondence included questions, I appreciate those being forwarded to the Public Information Unit, but that is separate from my request for records.

I am also willing to receive responsive records on a rolling basis as they become available rather than waiting until the entire request is completed.

Thank you,

Trace Kitzmann
