Cc: Joshua Ward <Joshua.Ward@cityofls.net>

Mr. Kitzmann,

Records Custodian / Supervisor Josh Ward forwarded me your questions that were outside the scope of a records request. My answers to your questions are listed below.

Your primary point of contact for information will remain with Supervisor Ward, if information is requested outside the scope of a records request it will be forwarded to the appropriate person for answers and returned to you.

Whether my plate was actually searched or scanned within the Flock/ALPR system.

- No officer had searched for your license plate in Flock, as stated in my previous email, and we cannot look to see if a camera captured the plate without a crime-related law enforcement reason, per our department policy GO 200.29 – Automated License Plate Reader System (ALPR). Policies can also be obtained by the general public on our Transparency Hub located at <https://cityofls.net/police-department/public-information/transparency-hub>.

What the City's current retention period is for Flock/ALPR photographs, plate reads, metadata, and related records.

-30 days. Information can be located on per our Transparency Hub and in GO 200.29.

Whether records responsive to my request may have existed but were deleted or automatically purged before the request was processed.

– As stated in previous emails, your license plate had not been searched by the LSPD in the Flock system. It is unknown if the plate was actually captured by Flock cameras, as stated above.

Whether any responsive records are maintained by Flock Safety or another third party rather than directly by the City.

The City owns and controls the data captured by the devices on our network. However, the data is hosted and maintained by Flock via a cloud platform rather than being maintained directly by the City in an "on premise" database.

Whether officers or other authorized users can access historical detections that the City's records custodian cannot.

The City's (City Hall) records custodian does not have the same system access or search capabilities as the Police Department authorized users.

Sgt. Chris Depue
LSPD Public Information Unit Supervisor
